Disposable instruments

medimex 

Foreword

Dear Sir or Madam,

medimex GmbH has been offering exclusive products to the medical sector for more than 50 years. We have expanded our product range with disposable steril instruments.

Our wide range of competitively-priced medimex disposable instruments guarantee that you will always have high-quality, single-use sterile instruments made of brushed and non-reflective steel ready to hand.

Your advantages at a glance:

Clear identification!

To avoid confusion with reusable instruments and prevent accidental reprocessing, our disposable sterile instruments have clear colour-coding for unique identification.

Secure protection!

The disposable instruments are packaged in a sturdy hard blister pack to better protect the instruments and the user.

Easy to use!

The hard blister pack ensures that no additional protective cap is required on pointed instruments. This eliminates the possibility of recontamination caused during the removal of protective caps.

Easy to remove!

Our disposable instruments are packed in dispenser boxes and can be removed individually.

Simple logistics!

For easier logistics and ordering, all disposable instruments are marked with a QR and UDI code on the individual packaging, the dispenser box and the outer carton.

CE marking on all products!

Of course, all products carry a CE marking.

If you do not find the disposable instrument you are looking for in our brochure, please contact us! We will be pleased to make you an offer for a custom-made product according to your wishes.

For ordering and price information, please contact one of our specialised trade partners or our customer service at:

tel: +49.6431.7302.300

mail: kontakt@medimex.de

We look forward to working with you.

Your medimex-Team
